Why is overtime cost rising?

Indus Weave Textiles -- HR data pipeline, April to September 2026

+23%

overtime bill, April to September
(PKR 2.81m to 3.48m a month)

75%

of that rise is overtime approved
but never worked (Stitching, Faisalabad)

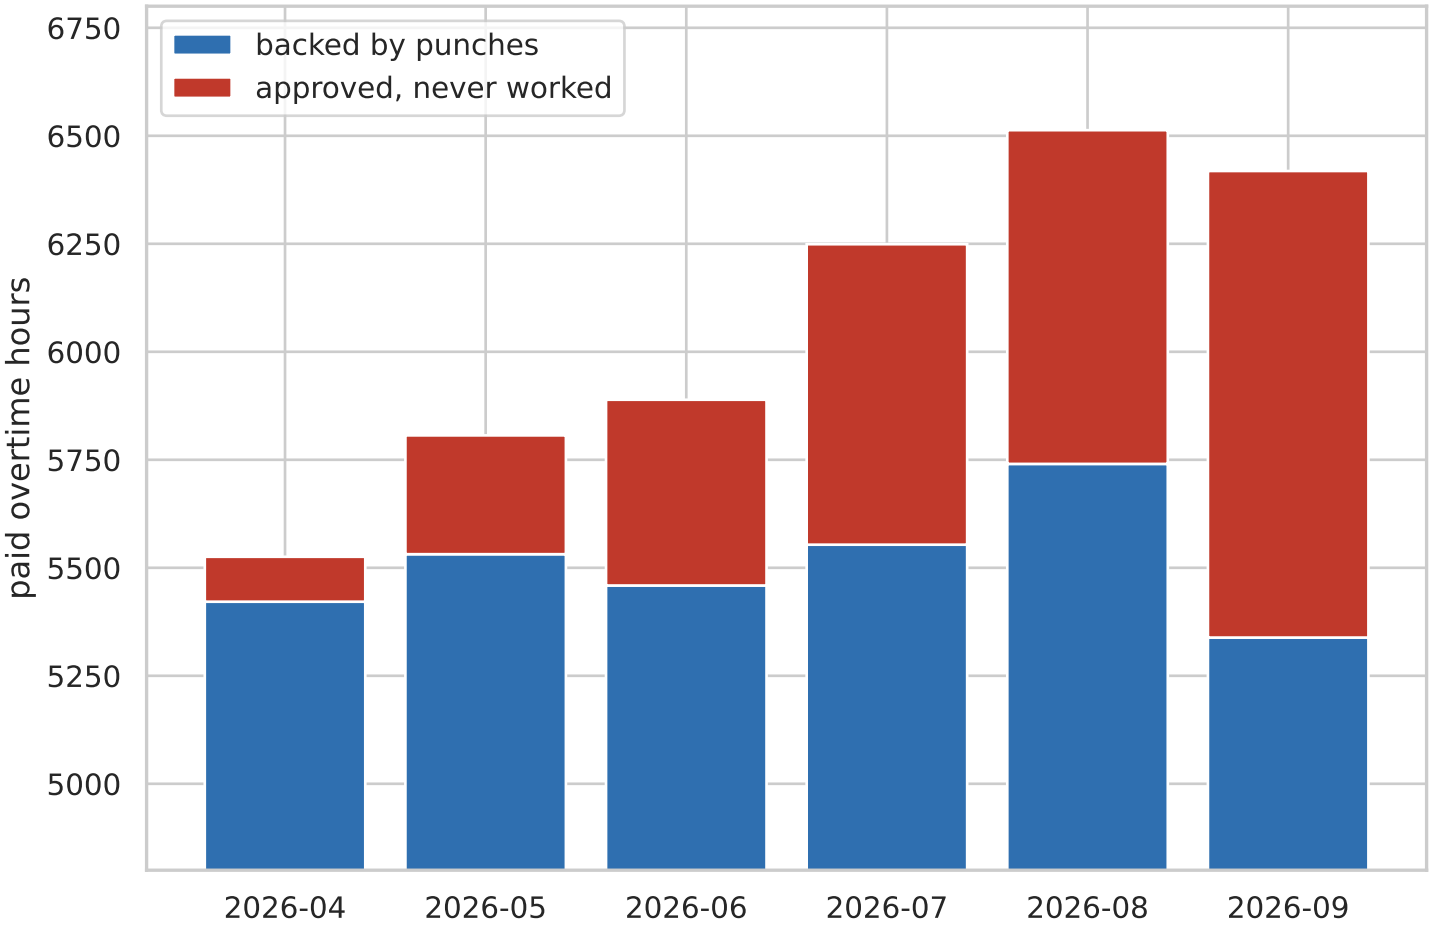
PKR 4.8m

paid to 6 people who never punched
and 5 who had already left

112 automated data quality checks passed | every raw row accounted for | 11 SQL answers

Finding 1: phantom overtime in one department

Stitching, Faisalabad Plant: every request approved by one approver



- 3,357 unsupported hours, about PKR 1.67m
- 104 hours in April to 1,080 in September
- 647 requests were for days with no overtime on the punches
- Approver E10382: 3,174 requests. Every other approver: 0 unsupported hours

Finding 2: payroll pays people who are not there

PKR 4,825,075 in six months

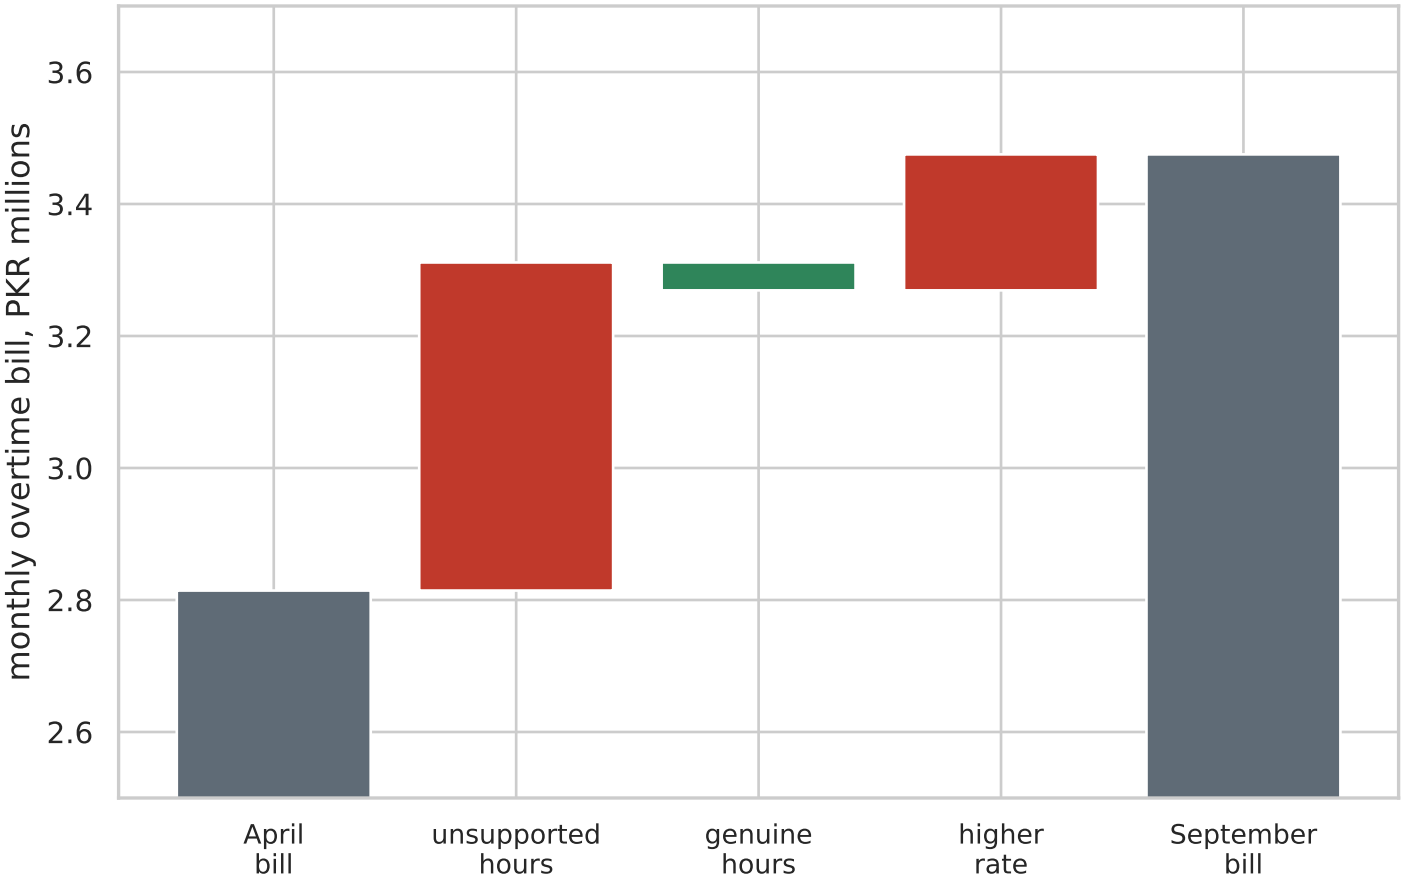
- 6 employees have no biometric enrolment: 884 Absent days, zero absence deductions, paid every month

- 5 employees left in April-May and were still paid 21 employee-months

- For everyone else, payroll absence deductions equal computed absent days -- so the gap is real, not a logic difference

Finding 3: the rest is a planned 10% pay revision

1,192 employees revised on 1 July; overtime is paid at 2 x hourly basic



- 75% of the rise: unsupported hours
- 31%: higher rate after the July revision (PKR 509 to 541 per hour)
- Genuinely worked overtime is flat to slightly down
- Control gap: 20 employees used more Annual leave than a full-year entitlement

How we know the numbers are right

raw -> staging -> warehouse, checked after every load

- 112 automated checks, 112 passed (raw 25, staging 35, warehouse 52)

- Every raw row is a staging row or a logged rejection (duplicates, unmapped punches)

- DEV-SITE-01's clock was an hour fast from 2026-07-01; found by comparing devices, corrected in code

- Night shifts dated by shift start; SCD2 history rebuilt because effective_to was unreliable

- Independent proof: payroll absence deductions match computed Absent days for every enrolled employee

Recommended actions

In order of money and urgency

- Suspend E10382's overtime approvals and audit 3,174 requests (Stitching, Faisalabad Plant)

- Stop pay for 5 separated employees; verify the 6 never-punched employees exist; recover PKR 4.8m where confirmed

- Release overtime in payroll only for hours that match the attendance result

- Block payslips for employees with no attendance, no leave and no separation processing

- Budget overtime at the post-revision rate; check leave balance before the HR approval step
